In 1 month from a 10-13-06 heavy snow in Buffalo, New York, U.S.A.,
there have been 4 large electric power failures, 3 in the U.S.A. & 1 in

and before humans... efficient universal energies & non-violence accumulates harmony

Proof(s) that civilization must perfect with reform(s): Clouds are consciousness patterns known calendar. July 2006 made report 8/20 TRAIN derailment (& -rls.) patterns, of universal energy cause + effects dates from TV news reports are clear & evident of non-coincidental other than human influences, & by observing the time spans between them listed below, even though all the U.S. & world d-rls. since Nov. 05 aren't presumably usually included in TV reports, most & many are, & those that aren't wouldn't significantly diminish the lucid non-random statistical accumulations of multiple & obvious' numerically consistent facts considered here - Also, ^{entire} 2 or 4 huge global areas are reasonable enough of an area to sample for significant proofs of non-human intelligences' repeated communications of diminishing controls by them, of universal energies, without significant multiple reforms, affecting national & international intelligences on both sides of human nature, human & non-human, responsibilities, learning & DNA similarly of the 14 reported d-rls. incidents I listed, copied from TV news reports, from Nov. 22, 2005, ^(last line below) the same day a large aquarium opened to the public in Georgia, later that day commuter traffic got stuck on Chicago RR tracks, a train hit cars, at least a few critical injuries occurred. Lastly that evening on national TV, at the Bowling Green vs. Toledo college football game, a cotton-tailed rabbit appeared in an end zone, & about 10 mins. later, probably at the opposite end zone (of camera angles), the offence at the 8yd. line, near scoring, fumbled unusually about 6yds, forward thru the center of the line, & the defense recovered. Some days before, I'd sent over a dozen letters to government authorities, predicting a series of multiple disasters in 4 days in the last wk. of Nov. 05, & my prediction realized, there were a many more than usual quantity of disasters & or near disasters in those 4 days & one in between (the 26th). I've observed patterns of phenomena, frequency progressions, studies of the "Facts on file" library News Encyclopedia's index: Accidents + earthquakes, in the previous years of 18+ more yrs, books on shelves... proving Apocalyptic ultimatums & or of perfecting harmony with non-violent reforms, i.e. insomnia, confusion, & or violence-contemplation 100% remedial variable quantifies of 10-20% sweet wines, & or exercise & baths... self control, happiness, morality & prevention of violence.

Four of 15 incidents were trains colliding with cars or trucks (two: two) fatalities in each of 4, 11 were d-rls. (probably all non-fatal). Any few incidents I missed wouldn't significantly effect the statistical & obvious fact & validity of the matching numerical analysis following:

Two days after the Chicago by Lake Michigan collision, a d-rl. near-by, so. of Chicago not far from a river, on 11-24... then 11-26, & -rls., Scotland, & 11-26, & -rls., Laurel, MT (at 3:22 AM); 2 days later, 7 mos. 8 days later (220 days), 7-2-06, 1 d-rl, MT, & a slow non-fatal collision of 1, non-fatal, no. on F. - 11-26-ne & 11-27-1.t.- (t. +) in - or 1 - 0 MTR (H.L.)

Violence doesn't solve problems. Civilization perverts with reformed...
There's change, improvement, & learning on both sides of human nature over centuries.
A list of circumstantial facts proving the Ash + Cinder Sun-Moon-Comet roasting surviving
dinosaurs eons ago: wolves howl at the moon; through a fog in winter daylight, the sun exactly
matches the size & luminosity of the full moon; the moon matches the sun's daily arc, in parallel So-West daylight early day settings of September equinoxes & also
in the previous (probably most other) early Spring times; the dinosaurs were reptiles, like
birds (in the early universal energies); they were egg-prolific; there were millions of them, but only 5 or 10,000 dinosaur skeletons on the planet; & mountain zones glo-
bally are abundant with huge, some low, long-elongated football shaped geologic
formations; some of those have wide fan-tailed bases, triangular, or mammalian pregan-
cy or origins, & most large boulders resemble digested dinosaurs, & some lie in alignment
behind the huge earth-whale forms; aka sektzer remnants firey sore stomachs
& upper digestive tracts; sea-shells & fish fossils in mountain zones were 'split up' by
by earth-whales (or from dinosaurs stomachs); the flood anciently happened on a smaller
planet, which used to be visible by the second star in the handle of the big-dipper constell-
ation; in conjunction with a triple crucifixion & burn, there were 2 arks, a square + nor-
oval boat & barge, Noah's (Israelites) & Zeph's (Zuluites), & Zeph wrote the ancient
origins of language abstractly in the log book of the square ark (square cemented pyr-
amid stones & rectangular scrolls, & of primal health & primal communications
then by consciousnesses). There eons before us, inspired temporary consciousness merges,
similar to 19th c. invasions of batteries, the telegraph, telephone, light-bulb & photo-
graph; consistent equinoxes, crypt biologic growth & twenty-four part years prove's orderly
goodwillng fish-bird-spirits-quadrupeds' universal growth & orbital powerful & apparent
& improving (with changed) energies & consciousnesses interactions; some % of clouds are
consciousnesses, by weather consciousnesses. In a T.V.-documentary ~ 10 yrs. ago evidenced both
Arks: multiple 19th c. newspaper hiker's reports of the square wood ark on Ararat, Aerial sightings
with photographs in the 20th c., & Aoval shaped petrified wood outline of the biblical sizes
laying c. 17 mi. south (e. or w.) of Ararat in a clearly delineated grass field, a view from above;
ancient language origins, temporary consciousness merges also are evident in some letter shapes
N.M. & a. others' expressions of the earth forms, mountains, apredator tooth with a stick-in-
roll-back-ricochet shape of fireballs by the pyramids, before any language significance clearly
some butterflies have white comet shaped spots on their wings; oceanic cuttlefish have
octopus-like appendage shaped tongues to grasp scripture fish with extensions, & art forms can
frictionally express conditions of reality, of inspired communications, as the science-not fiction -
but fact of the movie "Titanic", earth-whale, dinosaur-predator entity, of snakes'
ancient ancestors; rock climbing smaller tyrannosaurs young & petrified spirits ongoing struggles;
squirrels with red fingers on top & arson from their inner mantras by match factories, tree history,
Non-violence accumulates harmony. Violence never does. To solve any problems overtime,

The Taliban + Al Quaeda ('Arabian' terrorist organizations') basically, causally, fundamentally, are a deep sea committee of 'parrot-fish' entities, genetically 100% non-violent + harmonious - of regular concerns for orderly equinoxes (ants, crops, rain, fish, birds, clouds) - wrapping + packing (bugs) - awry + pervasive universal energies confusing Arabian + others' metabolisms, forcing violence, suicide bombings, but in form overtime (6 dozen fireball rolling pyramids built anciently, typically, without language, but with temporary consciousness merges of + with cure-repeat-communications conjunctive with the Nile + Western U.S.'s climate failures) - overtime proximity to large predators, metal fuel abusive conditions calling for euthanasia of the entire planet who farming the tropics, peace, channeling aggressions by alligator + efficient universal energies, volitional equinoxes more orderly regularities than the comet which may have u-turned; is no longer painful wars' regularities over centuries, crime, flying + driving fatalities, blights + plagues + trends persisting, disturbed yet volitional + errorful environmental yet evident facts + consequences of the 1000's: 1) human minority + pervasive, with non-human consciousnesses + energies cause + effects, yet change improvement + learning on both sides of human nature (nature + humanity), electric + mph to understand how to care about slower driving, peace, safe drug use + legalization, sunshine + moderation, intelligent beer soaked exorcism (sweet wine + baths + walking), care for love of confused Western + 3rd world (non-American, non-European, non-establishment, non-peoples - clear(?) - & to perfect the social order. 2-26-2-29. 1999 1-24 d-rL 1999 2-2 MINE 1994-9-BC 1-17F-8K 1-7m SW1 9-27-98C-G656
